

## ASBESTOS DISPOSAL

Acumen Waste Services provide a safe and efficient service to the asbestos abatement industry for the transportation and disposal of all types of asbestos bearing waste. As a member of the Asbestos Removal Contractors Association (ARCA), we are proud to be the preferred waste management partner to the premier operators within this sector.

Asbestos waste is transported using a modern fleet of hook lift vehicles and associated containers ranging from 20 to 40+ cubic yards. Hazardous materials are taken via HM Revenue & Customs approved weighbridges.

Our vehicles are strategically located throughout the UK and are equipped with trailers so they can transport two containers per vehicle when needed. This policy also mitigates the risk associated with handling, transferring and bulking of asbestos containing materials (ACMs) at intermediate locations and creates an entirely transparent audit trail for each individual waste collection.

We understand that providing a timely service is essential to the asbestos abatement sector and whilst buying in services at the most economical rates is important, the cost of poor service is immense compared to the small premium on the cost of the waste container.

The traceability, ease of auditing and transparency of transactions and movements of hazardous waste - all legal requirements under the duty of care set out in the UK's Environmental Protection Act - are of significant importance to many of our clients.

That is why we provide a detailed online reporting tool through our protected client area on our website. Important information such as site licenses, consignment paperwork, weight tickets and audit reports are uploaded on a daily basis. All our vehicles are tracked using satellite technology so your site managers get logistics information in real time.

## CASE STUDY

### Essential asbestos removal services delivered on time without halting work

Working for the UK's leading asbestos abatement contractor is a challenging business. After proving that we can rise to that challenge, Acumen was awarded a contract to supply waste management services to their group of companies.

Asbestos removal is a complicated and labour intensive process and generates a very hazardous waste material that must be removed from sites in specialist sealed containers.

Our team of experts proved to the client that Acumen could provide the container service on time, time after time, and that their high-cost labour force would not need to stop work to wait for the waste to be removed - which had been their experience before contracting with Acumen.

The agreement between the organisation and Acumen is now in its third successful year and the strong partnership looks set to continue...

### Online Client Area with Real Time Reporting

We realise that traceability, ease of auditing, transparency of transactions and movements of waste are paramount to your business. Providing full clearance certification and a duty-of-care audit trail to demonstrate the use of compliant solutions is a legal requirement under the duty of care set out in accordance with Section 34 of UK's Environmental Protection Act.

We provide detailed online reporting through the password protected client area on our website. Important information such as Environmental Permits, consignment paperwork, weight tickets and audit reports are uploaded on a daily basis. All our vehicles are tracked using satellite technology so your site managers receive logistic information in real time.

### 24 Hour Spill Response

As accredited spill responders we offer a highly trained and experienced team to respond to all types of land and water spills. We attend to emergencies such as:

Fuel oil spills, chemical and toxic substance spills, emergency clean ups, water contamination, hazardous substance identification and chemical and hazardous substance RTA incidents.

We will provide: vacuum tankers, drums and packaged waste re-packaging, high pressure jetting, remediation, waste collection and disposal.

### First Line Responders

We are first line responders for emergency response, environment protection, working with HSE and EA and the emergency services.

Make sure you have our hotline number - 0843 6580513

### Providing a Nationwide Service

Our multiple service locations throughout the UK means we can provide UK-wide coverage for the collection of waste materials.
