

INDUSTRIAL BULK AND PACKAGED WASTE DISPOSAL

Acumen Waste Services is a leading provider of Hazardous and Non-Hazardous Waste Disposal Solutions operating throughout the UK.

Running a transport fleet capable of moving bulk and packaged waste means we are equipped and perfectly placed to support a wide variety of industrial and manufacturing organisations from a diverse number of sectors.

We have worked extensively with businesses from the petrochemical industry to food manufacturers and government organisations including DEFRA and the Environment Agency.

Twenty-four hours a day, seven days a week, we are available to deal with all manner of waste including flammable, toxic, corrosive and hazardous wastes, which are harmful to people and the environment.

These wastes can be collected in our fleet of Vacuum Tankers in bulk or if they are packaged in Drums, IBC's or however you present them we have curtainsider and tail lift vehicles to transport them.

Should they need repackaging for safe transport and treatment we have the experts to provide this service on your behalf.

We are experts in all forms of site clearances, and provide an accredited emergency response service for spillages.

CASE STUDY

Sustainable solutions for the Chemical Industry

Recent changes to the UK's Duty of Care regulations means that waste producers must now confirm that they have considered every available disposal option. This means that sending waste to landfill not only means meeting the cost of an ever-increasing tax levy, but also a major non-compliance risk.

When a large chemical production facility in the North West faced this problem, we proposed a solution that included diverting much of their dry waste from landfill to a materials recycling facility. The waste producer can now boast vastly improved recycling statistics that are not only sustainable but more economical as well...

Online Client Area with Real Time Reporting

We realise that traceability, ease of auditing, transparency of transactions and movements of waste are paramount to your business. Providing full clearance certification and a duty-of-care audit trail to demonstrate the use of compliant solutions is a legal requirement under the duty of care set out in accordance with Section 34 of UK's Environmental Protection Act.

We provide detailed online reporting through the password protected client area on our website. Important information such as Environmental Permits, consignment paperwork, weight tickets and audit reports are uploaded on a daily basis. All our vehicles are tracked using satellite technology so your site managers receive logistic information in real time.

24 Hour Spill Response

As accredited spill responders we offer a highly trained and experienced team to respond to all types of land and water spills. We attend to emergencies such as:

Fuel oil spills, chemical and toxic substance spills, emergency clean ups, water contamination, hazardous substance identification and chemical and hazardous substance RTA incidents.

We will provide: vacuum tankers, drums and packaged waste re-packaging, high pressure jetting, remediation, waste collection and disposal.

First Line Responders

We are first line responders for emergency response, environment protection, working with HSE and EA and the emergency services.

Make sure you have our hotline number - 0843 6580513

Providing a Nationwide Service

Our multiple service locations throughout the UK means we can provide UK-wide coverage for the collection of waste materials.
